An updated apparmor patch set was included to better align with what is landing upstream. Get ready to install Ubuntu, we recommend that you connect your computer in a power source you should also have enough space on your computer to install Ubuntu we advise you to select download updates when installing and installing this third-party software now you should also stay connected to the internet so you can get the latest updates while installing Ubuntu if you are not connected to the internet, we will help you set up wireless in the next Step Configuration If you are not connected to the Internet, you will be prompted to select a wireless network if available. For compatibility purposes, the "admin" group will continue to provide access to the sudo / administrator at 12.04. I'm not sure about this step? Some highlights include: EXT4 gain support for larger base block sizes BTRFS has more work on data integrity problems Fine device gains and recursive instantaneous more work to improve performance in high quality charging network movements Congested Networks EXT3 MOVES To Use Barrier Memory Allocator Improvements VFS Scalability Improvements A new ISCSI implementation software expects to make important bad block management changes in Ubuntu kernel from Kernel 3.0.0 -12.20 Ubuntu as shipped in Version 11.10 Ubuntu include: Anxase for the Linux Kernel is upstream v3.2.14. It results in considerable energy savings à € à €
